Secret Remote Phone Listening Make Easy

Spyphone 2009 Mobile Phone Voice & SMS Interceptor

Master phone gathers clues. No evidence will be left behind on the target mobile phone

1. This software works on **Symbian Mobile Phones**.
2. This is an all new Spy Phone Software, completely re-written from sketch.
3. No reboot or backlight after x amount of spy call time.
4. No freezing (especially during call interception).
5. Handles unlimited call conference callers.

Install our intelligent software on any compatible mobile phone handset and you will receive our groundbreaking Ultimate Spyphone Pro software package. **This is the original, unrivaled software which now supports brilliant recording features.** Recovering stolen handsets and finding missing children are just 2 examples of using this amazing software.

This is an excellent monitoring tool to be used as an additional security layer to your handset, **ideally to combat mobile phone theft or mobile intimidation.** Our software uses a highly advanced and intelligent program that works in its own environment without conflicting with the normal operation of the handset to offer the very best mobile phone surveillance on the market.

Our **Ultimate Spyphone Pro** combines our original Full Suite software package with fantastic new recording features. **You can remotely trigger the software to record the room environment or record all your incoming and outgoing calls** (with time & date) which are then seamlessly **uploaded to your email address** for playback or storage. Gathering audio evidence has never been easier.

Frequently Asked Questions:

▶ **I see lots of this type of software but for much cheaper. Why ?**

It's about time we made the truth clear. **We ask you to try any other software available and see how it lasts or how good it actually is before it ruins your handset.** We can provide all other software is either a copy or very poorly programmed and is nowhere near the same quality genuine software we can offer.

▶ **Do you offer a guarantee ?**

Absolutely! We 100% guarantee our software is genuine from our software developers in Europe and we have been given unconditional supports. We can guarantee our software WORKS.

▶ **Why is Ultimate Spyphone Pro different ?**

We have taken our original Full Suite software and **added groundbreaking new recording features.** There is nobody else in the world who can offer this software. You can now **remotely trigger the software to activate the recording feature for either the surrounding room environment or switch to record all incoming and outgoing calls.** The hidden audio files are then silently uploaded via small packets of GPRS to your specified email address for playback or storage as evidential proof.

▶ **Is there any third party intervention or is the software operating through a server ?**

Our software is standalone which means there is **no other communication protocol except** between the Target

Phone and Receiver Phone. Once installed, our software only obeys the number you inputted as the receiver phone. No server and no secondary communication protocols whatsoever.

► **Why would I want to use this software ?**

Typical uses would be to **gather audio evidence of your child's mobile phone activities**. Maybe there is bullying or intimidation taking place and you need the **audio evidence to prove this**. If your handset is stolen, you will receive the thief's recorded content of all incoming and outgoing calls accompanied with a time & date. In both instances, what better way to present evidence.

► **Why is it that only you can sell this software ?**

Only the true developers can offer genuine, stable and unrivaled software.

This is a brand new world first release:

- 100% GENUINE software
- One file installation
- Very low memory for ultimate performance
- Easy to install
- Does not conflict or tamper with the handset
- No sensitive data stored on 3rd party servers
- Full control of the software via simple SMS commands
- Full Suite features are perfect for obtaining evidential proof
- No logging whatsoever
- Completely hidden software
- Bullet proof reliability
- Future proof technology

第九代監聽手機, 新增通話錄音、現場錄音功能
